■Assembly Method for the Assist Stool■

When you assemble the Assist Stool's height adjusters or store them inside the stool, please place the adjusters parallel to the 2 lines carved into the bottom wooden plate.

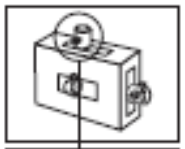

Carved lines in the bottom plate

It is always necessary to align the height adjusters so that they are parallel to the carved lines.

If a height adjuster is not placed parallel to the carved lines as in drawing no. ② on the left, the top plate can't be fitted to the adjusters and the dowels will get caught. If you try to turn the plate, they will be damaged.

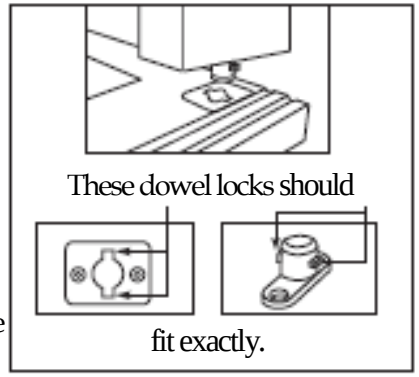

Height adjuster

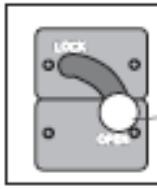

Dowel- convex

Dowel - concave

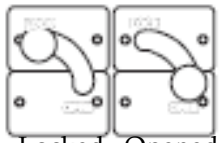

These dowel locks should fit exactly.

Latch

Knob

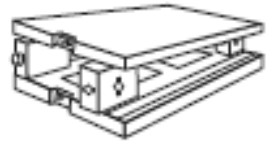

Locked Opened

* When locked, the position of the knob is on the top.
* When open, the position of the knob is on the bottom.
(You can hear clicking sound when they are set correctly.)

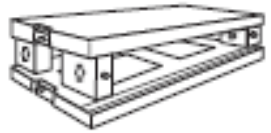

Procedure (Assembly method)

Align the 4 height adjusters so that they are parallel to the carved lines in the bottom plate.

Fit the top plate into the concave dowels.
(Check that all 4 height adjusters fit correctly)

If you rotate the 4 height adjusters 90 degrees (both clock wise or anti-clockwise are OK), the top plate and the bottom plate will be locked together.
Please make sure that both plates are locked together before using the stool.

Storing Method (Points to note)

1. Rotate the 4 adjusters so that they are parallel to the carved lines in the bottom plate. Then remove the top plate by lifting it straight up with both hands.

   Do not lift the top plate upward on an angle. If the top plate is caught by the dowels, or something else, realign the adjusters so that they are parallel to the carved line.
   * If the top plate is caught by dowels, do not forcibly move it. This will damage the dowels.

2. Remove the 4 height adjusters from the bottom plate. Then, place them in the storage pockets.

3. Combine the bottom and top plates. Then fix the latch knobs in the "Lock" position. The stool would now be safe to carry.

To the guardians Please instruct children carefully so that they can use the stool in the correct way.
