USER'S MANUAL

※Before using the Assist High Tool, please read this user's manual in order to use it correctly. Also, please keep the manual for your future reference.

ASSIST PEDAL ASP-Ⅱ

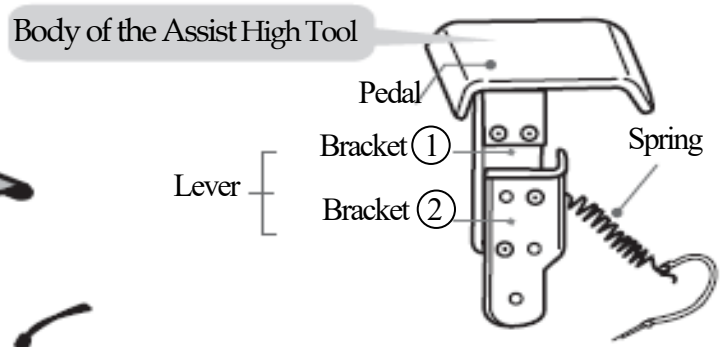

※ This lever is used to increase pedal force.

ASSIST HIGH TOOL ASH-V

※Use the Assist High Tool by attaching it to the Assist Pedal. This allows you to adjust the height of the Assist Pedal at 5 levels.

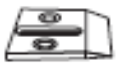

○ Details of how to adjust the height are shown in our Homepage.: http://www.genepis.jp

◎ In order to pedal smoothly, the High Tool is set to move back and forth slightly when you step on it.

※ Please check to see that you have all the accessories.
